

## **G1 Bare Bow COVER Kit G01-BW-02**

- Bare Bow cover kit for G1 riser
- Special design for perfect vertical balance
- Replaces the standard Aluminum cover of the G1 riser and also fits the GQ-25 riser and the G2 riser (limited combinations only)
- Symmetric mount, allows four different balances for each kit
- 3 front holes with ¼-20 UNC thread for additional weights (not all models)
- Steel; Stainless steel or Aluminum Black anodized parts
- 2 full kits allow any combination of weight from 400gr to 1170 gr

**Normal Position**

**Reverse Position**

**Left Plate**

**Right Plate**

**Center**

**G01-BW-02-SSS**

**G01-BW-02-SAS**

**Attention!:** “Left Plate” is intended as the plate to be positioned to the window side for an RH riser when assembled kit is used in normal position. For example, if you want an heavier side to compensate the window of the riser for torsion, you should choose:

- G01-BW-02-SAA or SSA if you use normal position and you have an RH riser or you use reverse position and you have an LH riser
- G01-BW-02—AAS or ASS if you use reverse position and you have an RH riser or you use normal position and you have an LH riser.

**Warning!** Use of combinations over 700 grams are not suggested on G2 Riser as of the limited support it can offer by its 4 x M4 tapped holes. Their use voids G2 warranty
